

Journal of the Senate

SECOND REGULAR SESSION

FORTY-FIRST DAY—THURSDAY, MARCH 31, 2022

The Senate met pursuant to adjournment.

Senator Bean in the Chair.

The Reverend Carl Gauck offered the following prayer:

“Three things restore a person’s good spirits: beautiful sounds, sights, and smells.” (Babylonian Talmud, Berakhot 57b)

Loving Father, sometimes we see the world parched and behold none of the beauty You have created so let us turn from such places and direct our attention to Your steadfast love and the love of those You have given us to love. Help us Lord to see the beauty and caring around us and help us Lord enjoy the sights and sounds and delights that You have put before to enjoy. In Your Holy Name we pray. Amen.

The Pledge of Allegiance to the Flag was recited.

President Kehoe assumed the Chair.

A quorum being established, the Senate proceeded with its business.

The Journal of the previous day was read and approved.

The following Senators were present during the day’s proceedings:

RESOLUTIONS

Senator Williams offered the following resolution:

SENATE RESOLUTION NO. 705

Whereas, nearly 841,000 individuals in the United States have died from a drug overdose since 1999; and

Whereas, substance use disorders and drug overdoses affect all socioeconomic groups, racial and ethnic groups, geographic regions, and ages; and

Whereas, substance use disorders are a chronic disease, and recognizing those disorders as such decreases stigma and acknowledges that substance use may be beyond the control of an individual; and

Whereas, overdose deaths are preventable, and lives can be saved through awareness, prevention, intervention, treatment, and recovery support; and

Whereas, substance use disorder is seen by both the Centers for Disease Control and Prevention and the World Health Organization as a fast-growing epidemic that can all too easily lead to overdose and death; and

Whereas, more than 100,000 individuals in the United States died from drug overdoses in the twelve month period ending April 2021; and

Whereas, for every drug overdose that results in death, there are many more nonfatal overdoses, each taking an emotional and economic toll on the individual, their family, and the community at large; and

Whereas, substance use disorder can fuel feelings of shame, guilt, embarrassment, depression, and hopelessness, causing individuals to resist seeking treatment and support; and

Whereas, International Overdose Awareness Day is a global event held on August 31st of each year to raise awareness of drug overdoses, to reduce the stigma of drug-related deaths, and to acknowledge the grief felt by families and friends remembering those who have died or have a permanent injury as a result of a drug overdose; and

Whereas, recognizing International Overdose Awareness Day in Missouri sends a strong message to former or current addictive substance users that they are valued and that overdose death is preventable:

Now, Therefore, Be It Resolved that the members of the Missouri Senate, One Hundred First General Assembly, Second Regular Session, hereby designate August 31, 2022, as International Overdose Awareness Day in Missouri; and

Be It Further Resolved that the Senate requests that the Governor order the capitol building to be lit in purple on that day and issue a proclamation calling on public officials and the residents of the State of Missouri to observe International Overdose Awareness Day with appropriate activities and programs each year.

Senator Onder offered the following resolution:

SENATE RESOLUTION NO. 706

Whereas, many people with serious, chronic mental illnesses, such as schizophrenia and other schizoaffective disorders, bipolar disorders, or severe depression, require treatment with medications that work as dopamine receptor blocking agents (DRBAs), including antipsychotics; and

Whereas, while ongoing treatment with these medications can be very helpful, and even lifesaving, for many people, such treatment can also lead to tardive dyskinesia; and

Whereas, many people who have gastrointestinal disorders, including gastroparesis, nausea, and vomiting, also require treatment with DRBAs; and

Whereas, treatment of gastrointestinal disorders with DRBAs can be very helpful, but for many patients can lead to tardive dyskinesia; and

Whereas, tardive dyskinesia is a movement disorder that is characterized by random, involuntary, and uncontrolled movements of different muscles in the face, trunk, and extremities, and, in some cases, people may experience movement of the arms, legs, fingers, toes, tongue, lips, and jaw. Other symptoms may include swaying movements of the trunk or hips and impact to the muscles associated with walking, speech, eating, and breathing; and

Whereas, tardive dyskinesia can develop months, years, or decades after a person starts taking DRBAs and even after they have discontinued use of those medications. Not everyone who takes a DRBA develops tardive dyskinesia, but, if it develops, tardive dyskinesia is often permanent; and

Whereas, common risk factors for tardive dyskinesia include advanced age and alcoholism or other substance abuse disorders. Postmenopausal women and people with a mood disorder are also higher risk of developing tardive dyskinesia; and

Whereas, a person is at higher risk for tardive dyskinesia after taking DRBAs for three months or longer, but the longer the person is on these medications, the higher the risk of developing tardive dyskinesia; and

Whereas, studies suggest that overall risk of developing tardive dyskinesia is between 10 and 30 percent; and

Whereas, it is estimated that over 500,000 Americans suffer from tardive dyskinesia and, according to the National Alliance for Mental Illness, one in every four patients receiving long-term treatment with an antipsychotic medication will experience tardive dyskinesia; and

Whereas, years of difficult and challenging research have resulted in recent scientific breakthroughs, with two new treatments for tardive dyskinesia approved by the U.S. Food and Drug Administration; and

Whereas, tardive dyskinesia is often unrecognized and patients suffering from the illness are commonly misdiagnosed. Regular screening for tardive dyskinesia in patients taking DRBA medications is recommended by the American Psychiatric Association; and

Whereas, patients suffering from tardive dyskinesia often suffer embarrassment due to abnormal and involuntary movements, which leads them to withdraw from society and increasingly isolate themselves as the disease progresses; and

Whereas, caregivers of patients with tardive dyskinesia face many challenges and are often responsible for the overall care of the patient; and

Whereas, the Senate can raise awareness of tardive dyskinesia in the public and medical community:

Now, Therefore, Be It Resolved that the members of the Missouri Senate, One Hundred First General Assembly, Second Regular Session, hereby designates the week of May 1, 2022, as “Tardive Dyskinesia Awareness Week”; and

Be it further resolved the members of the Missouri Senate encourage Missouri residents to become better informed about and aware of tardive dyskinesia.
