FISCAL ANALYSIS

ASSUMPTION

The **Joint Committee on Public Employee Retirement (JCPER)** has reviewed this proposal and has determined an actuarial study is not needed under the provisions of section 105.660, subdivision (5).

However, provisions contained in this proposal will increase the St. Louis Police Retirement System’s Unfunded Actuarial Accrued Liability (UAAL) and will result in an increase in annual employer contributions.

Officials with the **Kansas City Police Retirement System, St. Louis Metro Police Department, St. Louis Police Retirement System and County Employees Retirement System** assume no fiscal impact to their agency.

Officials with the **City of St. Louis** assume this proposal would increase the annual cost to the City however, without an actuarial cost study one cannot properly estimate the cost.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

DESCRIPTION

This act removes a provision that limited increased allowances in the computation of a member's average final compensation as to various benefits throughout the system to a total of three children. This act also no longer requires that the ordinary disability retirement allowance not exceed seventy percent of the member's average final compensation. Finally, a benefit paid to the surviving spouse will now consist of an amount equal to the officer's then current benefit for a period of one year and thereafter for forty percent of the deceased member's average final compensation.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
