DESCRIPTION

The proposed legislation allows a law enforcement agency to dispose of hazardous materials that have been seized as evidence once they have documented the materials. Current law requires representative samples of hazardous material to accompany the supporting evidence before it can be admitted in court. The proposal allows photographs, videotapes, or laboratory analysis to be used for prosecution purposes in order to verify and document the quantity of hazardous materials.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
