FISCAL ANALYSIS

ASSUMPTION

Officials from the **Public Service Commission (PSC)** state the bill will allow companies to file a request with the Commission to either not reduce rates when the CPI adjustment is negative or to apply CPI adjustments to certain exchanges or calling scopes. The PSC will have to review these requests, potentially hold a hearing to gather evidence, and determine whether the request is reasonable.

The PSC states this proposal will directly affect Total State Revenues because tax revenues are determined based on a customer's total bill amount for telecommunications services. If basic local rates are not reduced, or are targeted to a specific exchange or calling scope, tax revenues will be impacted.

The PSC assumes the proposal will impact small businesses since the proposed legislation states that when the CPI index is negative, basic local rates do not have to be reduced upon a finding of just cause by the Commission. To the extent small businesses have basic local service, rates will not decrease. Also, for telecommunications companies that are classified as small businesses, the companies will not see a decrease in revenues if it is determined that rates do not have to be reduced consistent with CPI adjustments. Small businesses may also be impacted by CPI adjustments that are targeted to specific exchanges or calling scopes as opposed to applied to all customers throughout the incumbent's service area.

ASSUMPTION (continued)

The PSC assumes no fiscal impact from the proposal.

Officials from the **Department of Economic Development - Office of Public Counsel** assume the proposal will not fiscally impact their agency.

Oversight cannot speculate on Public Service Commission decisions relating to potential rate change waiver requests, therefore no fiscal impact is assigned.

<u>FISCAL IMPACT - State Government</u>	FY 2007 (10 Mos.)	FY 2008	FY 2009

<u>FISCAL IMPACT - Local Government</u>	FY 2007 (10 Mos.)	FY 2008	FY 2009
	<u>\$0</u>	<u>\$0</u>	<u>\$0</u>

FISCAL IMPACT - Small Business

Small telecommunications businesses and possibly even all small businesses that have telephone service (when the CPI-TS for the previous twelve months has been negative) could be fiscally impacted as a result of this proposal.

DESCRIPTION

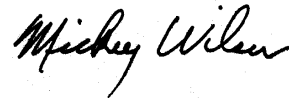

The proposed legislation provides telecommunication companies subject to price cap regulation the opportunity to request a waiver from the Public Service Commission of the requirement that tariffs be filed to reduce rates for any service in which the current rate exceeds the maximum allowable price. The request may be made in the event that the CPI for the preceding twelve months is negative and all revenues attributable to such a waiver shall be used for the purposes approved by the commission to benefit local ratepayers in a specific exchange or exchanges. Any request for a waiver must first be approved by the commission, for good cause shown, before taking effect.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
