FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Insurance, Financial and Professional Regulation** assume the proposal will have no fiscal impact on their organization.

Officials from the **Department of Health and Senior Services (DOH)** state the Bureau of Narcotics and Dangerous Drugs currently has four (4) Investigator II positions and one (1) Investigator III position to conduct inspections and investigations of the approximately 26,500 (26,430 as of 9/12/2006) state controlled substance registrants. This equals approximately 5,300 registrants per investigator (26,500 registrants/5 investigators).

As of December 11, 2006, there have been 4,999 advanced practice recognitions issued by the Missouri State Board of Nursing. It is assumed that all of these individuals will seek registration with the DOH, Bureau of Narcotics and Dangerous Drugs.

It is assumed this proposal will result in an increase of approximately 5,000 registrants. One (1) additional Investigator II (\$33,888 annually) will be needed to respond to the increased workload in performing activities for the increased number of registrants. The DOH assumes additional rental space of \$2,700 for the Investigator II will also be needed, along with equipment and expenses.

The DOH, Division of Regulation, will need to develop a new database in order to register the new applicants. The registry entries for advanced practice nurses will need to maintain the identification of the registrant delegating this authority under collaborative practice agreements. The current registry cannot store this information. The modifications necessary to register these individuals would require a new database at a total cost of \$246,636. No costs are included for on-going maintenance of the new database as information from the Office of Administration, Information Technology Services Division, indicates that the cost to maintain the new database should not be any more than the cost of maintaining the current database.

Additional registration fees will be generated by this proposal for the approximately 5,000 registrants at \$90 per three year registration. Total registration fees are estimated to be \$450,000 (5,000 registrants X \$90). This amount will be received primarily in a three-year cycle due to the three-year term of the registrations issued. New registrants beginning practice in Missouri in the intervening years would represent a very small number of additional licensed individuals. Accordingly, no revenue is shown in the fiscal note for FY 09 and FY 10.

ASSUMPTION (continued)

Oversight obtained information from the DIFP on the expected annual increase in new advance practice nurses (APNs) that may want to register with the DOH to have prescriptive authority. 387 new APNs received licenses in FY 06. Based on DIFP's expected annual growth rate of 3%, **Oversight** assumes a total of 12 new APNs would register to have prescriptive authority in 2009. Total additional registration revenue for the DOH in 2009 would be \$1,080 (12 new registrants X \$90). **Oversight** assumes 13 new APNs would register to have prescriptive authority in 2010. Total additional registration revenue for the DOH in 2010 would be \$1,170 (13 new registrants X \$90).

Oversight also assumes the DOH would not need additional rental space for one new employee.

This proposal will result in an increase in total state revenues.

FISCAL IMPACT - Small Business

Small business physician offices and clinics that pay the fees for controlled substance registrations for their practitioners will incur an additional cost in paying for the registrations of their advanced practice nurses. Federal registrations for these individuals must also be obtained from the U.S. Drug Enforcement Administration at \$551 per three-year registration before independent activities may begin.

FISCAL DESCRIPTION

Currently, advanced practice registered nurses have the authority to administer, dispense and prescribe certain drugs while operating under a collaborative practice agreement. This proposal authorizes advanced practice registered nurses to administer or dispense controlled substances in schedules II, III, IV, and V while operating under a collaborative practice agreement.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
