FISCAL ANALYSIS

ASSUMPTION

Section 197.318

Officials from the **Office of the Secretary of State (SOS)** state many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$2,500. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with the core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

Oversight assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of regulations at substantial costs, the SOS could request funding through the appropriation process. Any decisions to raise fees to defray costs would likely be made in subsequent fiscal years.

Officials from the **Department of Insurance, Financial Institutions & Professional Registration (DIFP)** state that having reviewed the proposed legislation and having sought the conclusion of the appropriate board(s), DIFP are of the opinion that this proposal in its present form has no fiscal impact to the Department.

Officials from the **Office of the Attorney General (AGO)** states that the AGO represents the Certificate of Need Board. The AGO assumes that because of this proposal's change in licensing criteria, the AGO may have an increased number CON Board decisions it must defend. AGO assumes that any potential costs arising from this proposal can be absorbed with existing resources.

Officials from the **Department of Mental Health** state the proposal would modify Chapter 197, RSMo by allowing the transfer of long-term beds to certain new health care facilities. DMH facilities are not subject to Chapter 197, RSMo; therefore, DMH would not be affected by this proposal.

ASSUMPTION (continued)

Officials from the **Department of Health and Senior Services** assume the proposed legislation would affect only those new Continuing Care Retirement Communities (CCRCs) which have a minimum of 1,000 independent living facility beds and a medical clinic. The Department believes that there could be one or two new CCRCs annually which would benefit from this proposed legislation. As a result, these continuing care retirement communities would not be subject to the Certificate of Need review or application fee, resulting in a loss to General Revenue. The Department projects the amount of application fees which would not be received to be approximately \$30,000.

Officials from the **Department of Social Services - MO HealthNet Division (MHD)** assumes that as a result of this proposal new health care facilities may be licensed and/or built without going through the certificate of need process by transferring current licensed skilled nursing facility beds from other existing facilities to the new facility. This could result in a higher per-diem rate for the new facilities. It is also assumed that the number of residents and days would remain the same.

To estimate the fiscal impact to the MHD, costs for one new facility would be calculated as follows. Assuming that the new facility is part of a compound with 1,000 independent living beds, there could be a maximum of 91 new skilled nursing facility beds (ratio of 1:11). The total patient days would be calculated by taking the total bed days of 33,215 (91 X 365 days) times the average Medicaid occupancy rate of 45% (SFY 08) to yield 14,947 Medicaid days. If the beds are transferred from an existing facility with a rate of \$126 (average NF rate) to the new facility, the new rate would be approximately \$136 (the average new facility rate for the past year). Multiplying this rate difference of \$10 by 14,947 Medicaid days results in an estimated impact of \$149,470 for each new facility qualifying under this proposal.

The number of new facilities and new beds as a result of this legislation is unknown; however, it is assumed that at least one new facility will be licensed. The estimated fiscal impact to the MHD is unknown but greater than \$149,470.

Oversight notes that states can earn the federal medical assistance percentage (FMAP) on Medicaid program expenditures. The Social Security Act requires the Secretary of Health and Human Services to calculate and publish the actual FMAP each year. The FMAP is calculated using economic indicators from state and the nation as a whole. Missouri's FMAP for FY10 is a 64.51% federal match. The state matching requirement is 35.49%.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

Section 197.318

The proposed legislation provides that a new health care facility may be licensed without certificate of need review when arranging for the transfer of licensed skilled nursing facility or assisted living facility beds to a new health care facility so long as the following criteria are satisfied:

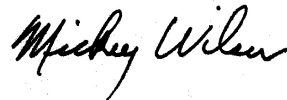

- (1) A letter of intent to develop the new facility is submitted to the Department of Health and Senior Services and the Missouri Health Facilities Review Committee;
- (2) The Department certifies that the beds proposed for transfer are from skilled nursing or assisted living facilities in Missouri and have maintained an average occupancy in the relevant licensure category of under seventy percent for the previous six calendar quarters;
- (3) The proposed new health care facility is an integrated part of a continuing care retirement community that includes a minimum of 1,000 independent living facility beds and a medical clinic and otherwise satisfies all conditions of licensure under current law; and
- (4) The number of skilled nursing or assisted living facility beds in the proposed new health care facility does not exceed a ratio of 1:11 as compared to the previously mentioned independent living facility beds.

The facility transferring beds under this legislation shall not seek to add beds within a five-year period of time after the transaction.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
