FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Economic Development (DED)** assume a positive impact on General Revenue resulting from increases to the Missouri Quality Jobs. DED assumes the Equity Investment Tax Credit will require one person to administer. DED assumes the Equity Investment Tax Credit will cost \$5 million per year and positive economic benefits will offset costs by year three. DED assumes costs shown in FY 10 may be needed sooner and be requested through emergency appropriation if the bill goes into effect prior to July 1, 2009 (FY 10).

Over all costs would include one personnel and associated costs which are estimated to total roughly \$85,000 per year. This FTE would be responsible for the Equity Investment Tax Credit program. These costs would be offset by an unknown but positive economic benefit to Missouri. The exact number of additional applications expected as a result of removing the cap on Missouri Quality Jobs is unknown. If a significant number of applications are received, additional FTE will be requested through the budget process.

Oversight has, for fiscal note purposes only, changed the starting salary for DED's Economic Development Incentive Specialist II to correspond to the second step above minimum for comparable positions in the state's merit system pay grid. This decision reflects a study of actual starting salaries for new state employees and policy of the Oversight Subcommittee of the Joint Committee on Legislative Research. Oversight also assumes DED will not pay additional flooring space expense to house this one FTE within the Truman Office Building.

Officials from the **Department of Revenue (DOR)** assume the proposal would not fiscally impact their agency. DOR states that due to Statewide Information Technology Consolidation, DOR's response to a proposal will now also reflect the cost estimates prepared by OA-IT for impact to the various systems. As a result, the impact shown may not be the same as previous fiscal notes submitted. In addition, if the legislation is Truly Agreed to and Finally Passed the OA-IT costs shown will be requested through appropriations by OA-IT.

Office of Administration Information Technology (ITSD DOR) estimates the IT portion of this request can be accomplished within existing resources, however; if priorities shift, additional FTE/overtime would be needed to implement. The Office of Administration Information Technology (ITSD DOR) estimates that this legislation could be implemented utilizing 3 existing CIT III for 1 month for system modifications to MINITS and 3 existing CIT III for 3 months for system modifications to COINS, Café, and E-file. The estimated cost is \$53,292.

ASSUMPTION (continued)

RS:LR:OD (12/02)

Officials from the **Office of Secretary of State (SOS)** state many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$2,500. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with the core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

Officials from the **Office of Administration - Budget and Planning** did not respond to our request for fiscal impact.

Oversight will range the fiscal impact of the tax credits for equity investments in technology-based early stage companies from \$0 (no tax credit issuances and/or redemptions) to the annual limit of \$5 million. Oversight will also range the fiscal impact of the removal of the annual cap on the Quality Jobs act as \$0 to (Unknown).

Oversight compared the total tax credit issuances relative to the total tax credit redemptions for the previous four years in order to determine a relationship between the two. Oversight discovered that the annual redemptions ranged from 81 percent to 86 percent of the annual issuances. Depending on the program, the redeemed credits may have been issued several years prior and carried forward to the years studied; however, Oversight will utilize an estimated redemption total of 83 percent of tax credits issued. Therefore, under this proposal, if \$5,000,000 of credits are issued under the new program, Oversight would assume \$4,150,000 (83%) of credits to be redeemed, reducing Total State Revenues.

Oversight assumes there would be some positive economic benefit to the state as a result of the changes in this proposal, however, Oversight considers these benefits to be indirect and therefore, have not reflected them in the fiscal note.

This proposal could reduce Total State Revenues.

FISCAL IMPACT - Small Business

Small businesses that qualify for the programs within this bill could be positively impacted as a result of this proposal.

FISCAL DESCRIPTION

This act allows the Department of Economic Development to authorize up to \$5 million in tax credits per year to encourage equity investment in technology-based early stage Missouri companies, commonly referred to as angel investments. Investors who contribute the first five hundred thousand dollars in equity investment to a qualified Missouri business may be issued a tax credit equal to thirty percent of the investment or forty percent of the investment if the qualified business is located in a rural area or distressed community. An investor can receive a credit of up to fifty thousand dollars for an investment in a single qualified business and up to one hundred thousand dollars for investments in more than one qualified business per year. Tax credits for equity investment in technology-based early stage Missouri companies may be carried forward for up to three years or transferred. The act also removes the sixty million dollar annual limitation on tax credit issuance for the Missouri Quality Jobs Act.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
