FISCAL ANALYSIS

ASSUMPTION

In response to a similar proposal from this year (HB 190), officials from the **Department of Labor and Industrial Relations** assumed the proposal would not fiscally impact their agency.

In response to a similar proposal from this year (HB 190), officials from the **Department of Economic Development (DED)** stated no new FTE would be needed as a result of this proposal as existing staff will be able to absorb the additional workload. Program costs will increase due to the increased need and demand to fund pre-employment incentive projects as defined through this legislation. At an estimated cost of \$100,000 per project, we project year one projects will cost \$1 million. As economic incentive projects commit, this estimate is anticipated to increase to \$2.5 million in FY 2011 and \$4 million by FY 2012.

Oversight will utilize DED's estimate of increased program usage resulting from the changes made in the proposal. Oversight will show the increased appropriation from the General Revenue Fund and the increased program expenses as a zero net effect to the Missouri Job Development Fund (0600).

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

This act allows the Department of Economic Development to include pre-employment training in its new or expanding industry training. The act specifies what services may be provided including development of training plans, the provision of training through qualified training staff, fees for training professionals, and transportation expenses if the training can be more effectively provided outside the community where the jobs will be located.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
