FISCAL ANALYSIS

ASSUMPTION

The **Joint Committee on Public Employee Retirement (JCPER)** has reviewed this proposal and has determined an actuarial study is not needed under the provisions of section 105.660, subdivision (5).

Officials from the **Missouri State Employees' Retirement System (MOSERS)** assume the proposed legislation described in Fiscal Note No.5809-01N (HB 1741) would, if enacted, reestablish the employer contribution rate for College and University Retirement Plan (CURP), which is a small defined contribution plan administered by MOSERS for professors and administrators holding faculty rank at state colleges and universities. As proposed, the employer contribution rate would be changed to 7% of payroll from 1% of payroll less than the normal cost contribution rate of the defined benefit plan. In addition, the proposal would allow, by resolution of a university's governing body, to prospectively require employees hired on or after July 1, 2103, to contribute an additional amount up to 4% of payroll. Lastly, the legislation would prohibit any outside employee who first becomes an employee on or after July 1, 2013, from making a one-time election to participate in the defined benefit plan administered by MOSERS.

Presently, the CURP employer contribution rate is equal to 1% of payroll less than the normal cost contribution rate of the defined benefit plan. MOSERS current normal cost for pre-2011 hires is 8.84%; the normal cost for post-2010 hires is 3.37%; and the combined normal cost is 7.80% (the current CURP contribution rate for FY 2012 is 6.80%). Because the plan changes that were enacted last year significantly altered the design and normal cost of the defined benefit plan, an unintended consequence is that, over time, there will be a significant decline in the employer contribution to the CURP, thus diminishing the value of the plan for those participants. This legislative proposal ties the employer contribution rate to 7% of payroll in an effort to address this issue before the normal cost drops significantly.

Officials from **Linn State Technical College, Missouri Western State University, University of Missouri, University of Central Missouri, Missouri State University and Metropolitan Community College** assume there will be no fiscal impact to their agencies.
