FISCAL ANALYSIS

ASSUMPTION

Officials at the **Office of Administration's Division of Budget and Planning (BAP)** assume no fiscal impact from this proposal to BAP. This proposal renews the Homestead Preservation tax credit for tax years beginning in 2015. This proposal provides state funding to local governments to apply as credits on qualifying tax bills. This proposal will not reduce General and Total State Revenue but will increase General Revenue expenditures to the extent funds are appropriated (\$2.4 million was issued under this program in FY 2010, and \$0.8 million in FY 2011).

Officials at the **Department of Elementary and Secondary Education** assume this proposal would appear to re-authorize the Missouri Homestead Preservation Act. This would not impact state revenues; however, it would have a negative impact on the revenue stream of local governments. Our department has no means to calculate such impact.

Officials at the **Department of Revenue (DOR)** assume this proposal would require computer programming changes to various tax systems. The IT is estimated at \$36,961 for 1,344 FTE hours.

The General Assembly is required to appropriate the funds for this program. Without appropriation, no Homestead Preservation tax credits will be issued. Between 2005 and 2011, when this credit was authorized, as much as \$2.5 million in funds were appropriated for the credit. An average of 7,918 taxpayers received the credit per year, with an average of \$1.6 million awarded.

DOR's Collections & Tax Assistance Division anticipates receiving additional customer contacts regarding this credit. Collections & Tax Assistance requires one (1) Tax Collection Technician I for contacts on the non-delinquent tax line and one (1) Revenue Processing Technician I for contacts at field offices.

Oversight assumes DOR is provided with core funding to handle a certain amount of computer programming activity each year. Oversight assumes DOR could absorb the costs related to this proposal. If multiple bills pass which require additional staffing and duties at substantial costs, DOR could request funding through the appropriation process.

This proposal requires an appropriation before the credit can be claimed and it is unclear how many credits would be claimed. **Oversight** will assume the Department of Revenue could

ASSUMPTION (continued)

absorb the work of this proposal with existing staff. If unanticipated additional costs are incurred or the number of credits redeemed reaches the stated levels, then the Department could request additional resources through the budget process.

Officials at the **State Tax Commission** assume there would be no fiscal impact to the Tax Commission. However, the impact to political subdivisions resulting from this proposal would likely be similar to the previous costs of this act which are as follows:

Year	Number of Applicants	Total
2005	18,069	\$2,927,751
2006	4,826	\$1,031,018
2007	1,650	\$87,920
2008	10,992	\$2,450,013
2009	4,055	\$772,758

Officials at the **St. Louis County** assume this proposal would have administrative costs of 2 FTE (salary and benefits) estimated at \$100,000 a year and IT support costs of \$50,000 annually. The state only reimburses the revenues lost to the counties and not the administrative costs. However, if the state does not appropriate funds, then there are no administrative costs either, since the program would not be administered.

Officials at the **Kansas City Public School District** assume no additional unfunded mandates to us within the proposal. It reauthorizes a previous tax credit.

Officials at the **City of Columbia** assume little to no impact from this proposal.

Officials at the **Fulton Public Schools** assume this proposal appears to be revenue neutral for local districts provided the General Assembly appropriates funding for this homestead exemption.

Officials at the **City of Jefferson City**, the **City of Kansas City**, the **Francis Howell School District**, the **Joint Committee on Administrative Rules**, the **Missouri House of Representatives**, the **Missouri Senate** and the **Office of State Treasurer** each assume there is no fiscal impact to their respective organizations from this proposal.

ASSUMPTION (continued)

Oversight assumes that counties would not have a fiscal impact from the issuance of the homestead credit as the State offsets the loss to the county by the amount of the homestead credit.

Officials from the **Office of the Secretary of State (SOS)** state many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$2,500. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with the core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

Oversight assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of regulations at substantial costs, the SOS could request funding through the appropriation process.

Oversight assumes this credit previously sunset on June 28, 2010. This proposal extends this tax credit beginning on January 1, 2015 (FY 2015) and therefore Oversight will reflect a loss to state revenue for the credits issued in FY 2016 and FY 2017 due to when the tax returns are filed. This tax credit does not have an annual cap but requires an appropriation by the General Assembly. Oversight will reflect the loss of revenue to the State as zero (no appropriation is made) or the average amount issued over the last five years of the previous program (\$1,453,892) if an appropriation is made.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

This act reauthorizes the Homestead Preservation Act tax credit program which provided a property tax credit for qualified senior citizens and disabled individuals until it expired on August 28, 2010. This program is reauthorized beginning with the 2015 tax year and will sunset on December 31, 2018.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
