FISCAL ANALYSIS

ASSUMPTION

Officials at the **Office of Administration's Division of Budget and Planning (BAP)** assume this proposal would not fiscally impact BAP. This proposal establishes a process for designating Early Stage Business Development Corporations in the state and directs the state to pay a total of \$9 million annually for four consecutive fiscal years to these corporations beginning in FY 2015. This legislation will not impact Total State Revenue; however, it could increase General Revenue expenditures, subject to appropriation. This proposal may encourage economic activity, but BAP does not have data to estimate induced revenues.

Officials at the **Department of Economic Development (DED)** assume this proposal will have a negative impact ranging from \$0 - \$9 million dollars; however, since this is subject to appropriation, DED assumes no impact until such approval has been met. Once the appropriation has been made DED assumes that MTC will need one additional FTE to administer the program. The FTE will be an Economic Development Incentives Specialist and will be responsible for reviewing applications of the Early State Business Development Corporations, approving applications, creating program guidelines, and distribution of appropriated funds.

Officials at the **Department of Revenue** assume this proposal will not have an impact on the Department but will reduce State Revenues.

Officials at the **University of Missouri** assume there is no fiscal impact from this proposal.

Oversight assumes the creation of this new program outlined in this proposal may have a positive impact on the state. However, Oversight considers this to be an indirect impact of the proposal and will not reflect it in this fiscal note.

FISCAL IMPACT - Small Business

Small businesses that receive the funding may be impacted.

FISCAL DESCRIPTION

This bill requires the Missouri Technology Corporation (MTC) to distribute \$9 million for four fiscal years to no more than six Early Stage Business Development Corporations (ESBDC). An "ESBDC" is a not-for-profit corporation designated by the MTC to receive funds and award grants to winners of national or international competitions for early stage businesses with substantial operations or that are beginning operations in Missouri and have the potential for national or international sales or the development of new technologies. To be eligible for designation, the ESBDC must provide grants to for-profit companies without taking an equity interest in the company, and the grants must not be loans in the three largest metropolitan statistical areas (MSAs). The grants are limited to \$200,000 per company.

The grants must be distributed as follows:

- (1) One ESBDC in each of the three largest MSAs will receive \$2 million;
- (2) One ESBDC in a MSA containing the city of Columbia will receive \$2 million; and
- (3) Two ESBDCs operating in rural Missouri or smaller MSAs will receive \$500,000.

FISCAL DESCRIPTION (continued)

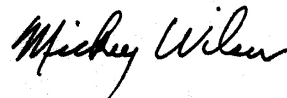

If the funds are not used in one area they may be redistributed to other ESBDCs in the same category. To be eligible for designation by the MTC, a not-for-profit in one of the three largest MSAs or an MSA containing the city of Columbia must raise at least \$2 million from other sources, and a not-for-profit in another MSA area of the state must raise at least \$150,000 from other sources prior to applying for the first time.

This section sunsets 4 years after the effective date unless this section is renewed.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
