FISCAL ANALYSIS

ASSUMPTION

Officials at the **Office of Administration's Division of Budget and Planning (B&P)** assume the proposal alters how the Department of Revenue distributes local sales taxes to municipal governments in St. Louis County. This proposal would not fiscally impact General and Total State Revenue. B&P defers to Department of Revenue for any programming or administrative costs.

Officials at the **Department of Revenue (DOR)** assume that beginning January 1, 2017, if revenue is less than or equal to that collected in 2014, the DOR distributes to all Group A and B cities, towns, villages and the county in Group B a portion of taxes based on the formula in Subsections 66.620.4 and 66.620.6. Beginning January 1, 2017, if sales tax revenues are greater than that of 2014, the Department distributes to Group A cities, towns, and villages, based on the location where the sales are consummated under Section 66.630 and Subsection 32.087.12 based on the formula in Subsection 66.620.5 and Subsection 66.620.6. Once the Department distributes funds to Group A entities, it must distribute funds to Group B entities following guidelines in Subsection 66.620.5 and 66.620.6.

DOR's Sales Tax Division will require change in the distribution to Group B cities in St. Louis County to ensure each city receives no less than 40 percent of the tax generated within that city, rather than relying solely on the distribution from the pool. Currently, St. Louis County takes care of the distribution, so unless they agree to continue to perform this action, the Department will need to completely establish the distribution for Group B cities.

DOR's Integrated Tax System would need changes resulting in a cost of \$168,854.

Officials at the **St. Louis County** assume this would cost the county \$300,000. The cost would be due to computer reprogramming. Additionally, this would result in a loss of approximately \$850,000 annually due to the redistribution of the tax.

Oversight assumes this proposal would have no net effect on local governments although individual cities may receive more or less revenue than is the case under current provisions.

Oversight assumes this proposal requires the DOR to distribute sales tax collections, thereby incurring the I.T. System cost. In addition officials from St. Louis County assume they will also incur computer programming cost of \$300,000.

ASSUMPTION (continued)

Officials at the **Joint Committee on Administrative Rules** and the **Office of the Secretary of State** each assume there is no fiscal impact from this proposal to their respective agency.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

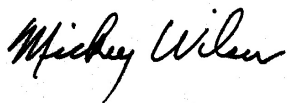

FISCAL DESCRIPTION

Currently, the revenues from a 1% sales tax in St. Louis County are distributed to unincorporated areas of the county as well as municipalities based on a formula. What are commonly called "Group B" entities pool their revenue from the tax. After a diversion to account for incorporation of previously unincorporated areas, revenues are generally split amongst the municipalities and unincorporated areas of the county in Group B by population, regardless of where the tax was collected. This act requires that beginning January 1, 2017, municipalities and the unincorporated areas of the county in Group B receive at least 40% of the tax revenue generated in such municipality or unincorporated area of the county. However, such new formula shall not apply in any year where the total amount of sales taxes collected in the county is less than the amount collected in calendar year 2014 and any adjustment to provide a Group B entity with 40% of the tax revenue generated in that area shall not result in another Group B entity receiving less revenue than it received in 2014.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
