FISCAL ANALYSIS

ASSUMPTION

Officials at the **Department of Elementary and Secondary Education (DESE)** assume this proposal makes changes to the funding formula. This section has the potential to be a savings in state aid. This change will result in a fiscal impact only if the formula is fully funded. This proposal changes the law to provide for a cap on the increase in state funding that is included in the calculation of the state adequacy target. This has the potential to be a cost saver for the state. The impact could exceed \$1 million.

Oversight notes that DESE and the Office of Administration's Division of Budget and Planning were not able to provide Oversight with a projection of when the foundation formula may be fully funded. This proposal has a provision that may not have a fiscal impact until such time as the formula is fully funded. Oversight for fiscal note purposes is showing the impact of that provision as if the formula were fully funded.

***Oversight notes that DESE and the Office of Administration's Division of Budget and Planning were not able to provide Oversight with a projection of when the foundation formula may be fully funded. This proposal has two provisions that may not have a fiscal impact until such time as the formula is fully funded (§§160.405 and 162.1250). Oversight, for fiscal note purposes, is showing the impact of those provisions as if the formula were fully funded.**

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

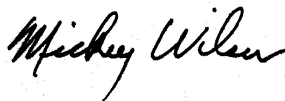

This act modifies the definition of "current operating expenditures" so that, when used to recalculate the state adequacy target as provided in this section, any increase in state funding attributable to an individual district shall be limited to two hundred percent of the aggregate percentage increase in state funding for all of the performance districts used in the same recalculation.

This act contains an emergency clause.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
