FISCAL ANALYSIS

ASSUMPTION

§170.028 Career and Technical Education Certification Program

Officials at the **Department of Elementary and Secondary Education (DESE)** assume this would require one Director position to oversee this program.

Many bills considered by the General Assembly include provisions allowing or requiring additional FTE to implement the act. DESE is provided with core leased space to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for leased space for new FTE for this fiscal note is a small amount and DESE does not expect that additional leased space would be required. However, DESE recognizes that many such bills may be passed by the General Assembly in a given year and that collectively, the costs may be in excess of what our office can sustain with current leased space. Therefore, DESE reserves the right to request funding for the cost of expanding FTE, including space, should the need arise based on a review of the bills signed by the governor.

Oversight has, for fiscal note purposes only, adjusted the salary and benefits of the Director position to correspond with the salaries posted by DESE for a current job vacancies for a similar position. Oversight assumes DESE has a core budget for travel expenses, so those costs have also not been included in the estimate of expenses.

Officials at the **Warren County R-III School District** assume it is unclear if the proposed legislation would have a fiscal impact on the district with relation to the phrase, "Cooperate with local school districts to ensure that the curriculum for the career and technical education certification program...will lead to industry-recognized certificates or credentials." If this will require changes in curriculum for the school district, then there would be some fiscal impact. It is indeterminate at this time.

Officials at the **Wentzville R-IV School District** assume \$3,000 in administrative costs to manage and record assessments taken by students.

Officials at the **Campbell R-II School District** assume a huge impact if more career and technical classes are required.

Officials at the **Forsyth R-III School District** assume the impact is unknown.

Officials at the **Bronaugh, Everton, Kansas City, Pettis County R-XI** and the **West Plains** school districts each assume there is no fiscal impact from this proposal.

ASSUMPTION (continued)

Officials at the **Kirksville R-III** and the **Mehlville** school district responded to **Oversight's** request but did not indicate a fiscal impact.

Oversight notes the Career and Technical Education delivery system consists of 444 comprehensive high schools, 57 area career centers, the State Technical College of Missouri, 12 community colleges, and 7 four year institutions.

§178.550 Career and Technical Advisory Council

Officials at the **Department of Economic Development** assume there is no fiscal impact from this proposal.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

This act creates the Career and Technical Education Certification (CTEC) Program. The purpose of the program is to provide students with the necessary technical employability skills to be prepared for an entry-level career in a technical field or additional training in a technical field.

The State Board of Education shall establish a procedure by which a student may receive credit toward graduation for completing a CTEC offering, which shall include but shall not be limited to an industry certification, a state-issued professional license, an occupational competency assessment, or a CTEC exam, as defined in the act.

The Career and Technical Education Advisory Council shall annually approve and publish a list of such CTEC offerings. During the approval process the Council shall ensure that the

FISCAL DESCRIPTION (continued)

curriculum and programs of study developed by local districts for the career and technical education certificate are compatible with the CTEC offerings. The Council shall also develop an application form that may be used by the business and industry communities, local school districts, or institutions of higher education to include new CTEC offerings.

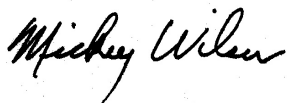

This act also modifies the composition of the Career and Technical Education Advisory Council by adding the director of the Department of Economic Development, or his or her designee.

This act also requires the Council to encourage local employers to participate in college and career fairs hosted by local school districts, and to cooperate with local school districts to ensure that the curriculum for the career and technical education certificate includes programs of study and course offerings that will lead to industry-recognized certificates or credentials.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
