Local Government	Could exceed \$100,000	Could exceed \$100,000	Could exceed \$100,000 to (Unknown)

FISCAL ANALYSIS

ASSUMPTION

§170.018 Computer Science

Officials from **Department of Elementary and Secondary Education** (DESE) assume this provision will result in a fiscal impact; however, DESE does not expect it to exceed \$100,000 in administrative costs. DESE defers to local school districts.

§170.018.1 (2) Computer Science Graduation Policy

Oversight notes this provision requires DESE to create a policy to allow one unit of academic credit with a district-approved computer science course to fulfill one science unit required for graduation. Currently, a student needs 3 units of science in order to graduate. Currently, computer science courses are allowed to count as a practical art (of which a student needs 1 unit) or as an elective (of which a student needs 7 units).

§170.018.2 Computer Science Work Group

Oversight assumes this provision requires the state board of education to convene a work group to develop academic standards relating to computer science. Oversight notes this provision requires the state board of education to adopt and implement academic performance standards relating to computer science.

§170.018.3 Teacher Endorsement

Oversight assumes this provision requires the state board of education to develop a procedure for a teacher who holds a certificate of license to teach and demonstrate sufficient content knowledge of computer science to receive a special endorsement on his or her license.

§170.018.4 Computer Science Education Fund

Oversight assumes this provision creates the Computer Science Education Fund which shall consist of appropriations and other moneys for the purpose of providing teacher professional development programs relating to computer science. Oversight assumes that all money will be used by the Fund in the year in which it is received.

Oversight notes in other fiscal notes for similar proposals, this fund was estimated to have an impact of less than \$100,000. However, upon further inquiry, DESE has noted there is no way to estimate the moneys that may be appropriated to this fund. Oversight will show an impact as could exceed \$100,000 in appropriations for the grant funding program.

ASSUMPTION (continued)

§161.261 STEM Career Awareness Program

Officials from **DESE** assume the request for proposal (RFP) would be issued for the amount available in the STEM Career Awareness Program Fund. Any cost to the state would be assumed by this fund. It is a supplementary online exploratory program for middle school students. DESE doesn't have anything comparable on which to base an estimate. Therefore, the cost is unknown; however, it has the potential to exceed \$100,000.

Oversight assumes this section requires DESE to establish an online statewide program which meets certain requirements for grades six through eight beginning in the 2019-2020 school year. Oversight assumes this section creates the STEM Career Awareness Program Fund which consists of appropriations and other monies to be used for establishing the STEM Career Awareness Program. Oversight assumes that all money will be used by the Fund in the year in which it is received.

Bill as a whole

Officials from the **University of Central Missouri** assume there would be a positive impact for the university.

Officials from the **Kirkville R-III School District** assume, if it is truly based upon appropriation, it will have no fiscal impact to the district.

Officials from the **Summersville R2 School District** assumes there is an unknown impact.

Oversight assumes there could be costs associated with developing a computer science course for school districts that currently do not offer one. Oversight will show the cost to school districts as unknown.

Officials from the **Department of Higher Education, Office of the State Treasurer, Northwest Missouri State University, Missouri State University** and the **State Technical College of Missouri** assume the proposal will have no fiscal impact on their organizations.

Officials from the **Joint Committee on Administrative Rules** assume this proposal is not anticipated to cause a fiscal impact beyond its current appropriation.

ASSUMPTION (continued)

Officials from the **Office of the Secretary of State (SOS)** state many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$2,500. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with the core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

Oversight assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of regulations at substantial costs, the SOS could request funding through the appropriation process.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

This act requires that before July 1, 2019, the Department of Elementary and Secondary Education (DESE) develop a high school graduation policy that allows a student to fulfill one unit of academic credit with a district-approved computer science course for any math, science, or practical arts unit required for high school graduation.

FISCAL DESCRIPTION (continued)

Additionally, before July 1, 2019, the State Board of Education shall convene a work group to develop and recommend academic performance standards relating to computer science. These standards shall be adopted and implemented beginning in the 2020-2021 school year. The Board shall also develop a procedure by which any licensed teacher who demonstrates sufficient content knowledge of computer science shall receive a special endorsement on his or her license signifying this specialized knowledge.

This act creates the "Computer Science Fund" for the purpose of providing teacher professional development programs relating to computer science. The Board shall award grants from the fund to eligible entities, as defined in the act, who have submitted an application to DESE, as specified in the act.

Subject to appropriation, DESE shall create the "STEM Career Awareness Program" to increase STEM career awareness among students in grades six through eight. The statewide program shall introduce students to a wide variety of STEM careers and technology through an online-based STEM curriculum. Before January 1, 2019, DESE shall solicit proposals and select a provider for the online program using specified criteria or choose a third-party nonprofit entity to implement the program, solicit proposals, and select a provider. The program shall be supported by the "STEM Career Awareness Program Fund" and shall be implemented beginning with the 2019-2020 school year.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
