FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Natural Resources** and **Department of Health and Senior Services** each assume the proposal will have no fiscal impact on their respective organizations.

Oversight notes that the agencies mentioned above have stated the proposal would not have a direct fiscal impact on their organization. Oversight does not have any information to the contrary. Therefore, Oversight will reflect a zero impact on the fiscal note for these agencies.

Officials from the **Cooper County Public Health Center** assume there will be unknown costs as a result of this proposal.

Officials from the **Columbia/Boone County Department of Public Health and Human Services (PHHS)** assume there will be unknown costs as a result of this proposal. The proposal requires PHHS to provide information on the impact of public water fluoridation to any public water supply which intends to modify the fluoridation of its water supply. It is unknown how many public water supplies in Boone County will seek to change their fluoridation practices. It is also unknown how often they may seek to change fluoridation practices. The proposal will require PHHS to research fluoridation impacts and remain current on new such research.

Oversight assumes local public health agencies (LPHAs) could incur some costs related to this proposal; however, Oversight notes these costs are unknown based on the information provided. Therefore, Oversight will reflect a potential “Unknown” cost to local public health agencies depending if this situation occurs.

Oversight only reflects the responses that we have received from state agencies and political subdivisions; however, other water supply districts and LPHA’s were requested to respond to this proposed legislation but did not. A general listing of political subdivisions included in our database is available upon request.
