COMMITTEE ON LEGISLATIVE RESEARCH OVERSIGHT DIVISION

FISCAL NOTE

L.R. No.: 0214S.01I Bill No.: SB 143

Subject: Tax Credits; Economic Development

Type: Original

Date: January 31, 2023

Bill Summary: This proposal establishes a tax credit for grocery stores in a food desert.

FISCAL SUMMARY

ESTIMATED NET EFFECT ON GENERAL REVENUE FUND				
FUND AFFECTED	FY 2024	FY 2025	FY 2026	
General Revenue		\$0 Up to	\$0 Up to	
Fund*	\$0	(\$25,134,118)	(\$25,126,589)	
Total Estimated Net		\$0 Up to	\$0 Up to	
Effect on General	\$0	(\$25,134,118)	(\$25,126,589)	
Revenue				

^{*}Oversight notes the above expenditure represent the potential maximum cap \$25 million and 1 additional FTE for the Department of Economic Development beginning in FY 2025.

FISCAL ANALYSIS

ASSUMPTION

Officials from the **Office of Administration – Budget & Planning (B&P)** assume this proposal creates tax credits for taxpayers who establish a new location within a classified food desert within the state. Based on data published in 2019 by the United States Department of Agriculture, there are 453 census tracts within Missouri that are classified as low-income and have a population that is located at least one-half mile from a full-service grocery store in urban areas or ten miles in rural areas. If these businesses were to locate in one of these tracts, the qualifying taxpayer would be able to claim tax credits against their state tax liability up to 50% of their eligible costs after the initial expenses have exceeded \$1,000,000 for stores established in charter counties, counties of first classification, or a city not within a county; or \$500,000 for stores located in any other county. No more than \$25M in tax credits that can be authorized in any given calendar year. This proposal also allows any tax credits that have been issued to be transferred, sold, or assigned.

"New location" is for real property acquired after 1/1/2024; therefore, general and total state revenues may be reduced as early as FY25.

This provision could lower general revenues by up to (\$25,000,000) beginning in FY25. This provision could impact total state revenue and the calculation under Article X, Section 18(e). Due to the carryforward provision in any given year, the amount redeemed may exceed the estimate shown after the first full fiscal year.

Officials from the **Department of Revenue (DOR)** assume the proposal would create a new tax credit for tax years beginning on or after January 1, 2024, for the construction or development of real property for the purpose of establishing a full-service grocery store in a food desert. The tax credit would be in the amount of 50% of the eligible expenses that are in excess of initial eligible expenses. A taxpayer becomes eligible for the tax credit only after initially expending \$1,000,000 (in a charter county, county of the first classification, or city not within a county) or expending \$500,000 (in any other county). The tax credit would be 50% of the expenses over these minimum limits.

The tax credit has a \$25 million cap. With each person not eligible to claim more than \$2.5 million per year. The tax credit can be carried forward for three tax years and is transferable, but is not refundable.

The full amount of the tax credits issued, plus a reasonable rate of return on the value of the credits, is subject to "'clawback" if the taxpayer fails to complete construction of the full-service grocery store within five years of project commencement or fails to operate that store at the same location for ten consecutive years. DED is given regulatory authority regarding this credit, and the credit is subject to a sunset clause.

This proposed legislation could potentially decrease Total State Revenue, specific to General Revenue by an estimated \$25 million per year. DOR notes this tax credit begins January 1, 2024, and therefore, the first tax returns will be filed starting in January 2025.

Fiscal Year	Decrease to Total State Revenue - General Revenue
FY 2024	\$0
FY 2025	(\$25,000,000)
FY 2026	(\$25,000,000)

This would be a new income tax credit that would need to be added to the MO-TC form, our website and to our individual income tax computer system. These changes are estimated to cost \$7,193.

Due to the limited number of taxpayers each year that may qualify for this credit DOR assumes it can absorb the additional work from the redemptions of this credit using existing FTE. However, should the number of redemptions received equal the following limits, DOR would ask for additional FTE during the appropriation process. DOR needs FTE to process tax credits if the following number of items are received.

- 1 FTE Associate Customer Service Representative for every 6,000 credits redeemed
- 1 FTE Associate Customer Service Representative for every 4,000 tax credit transfers with CISCO phones and license.
- 1 FTE Associate Customer Service Representative for every 7,600 errors/correspondence generated

Oversight notes DOR is responsible for the redemption of tax credits against a taxpayer's state tax liability as well as reallocating tax credits as a result of any sale, transfer, or assignment of tax credits. Furthermore, DOR is responsible for generating correspondence should tax returns fail to provide the necessary documentation to warrant tax credit redemption(s) and appropriately process the correspondence they receive in response.

Oversight notes the tax credit program proposed has an annual cap of \$25 million. Furthermore, taxpayers who qualify for the tax credit created may claim a tax credit up to \$2.5 million per tax year. Therefore, Oversight assumes the minimum number of taxpayers that could qualify and claim this tax credit each year (and utilize the entire cap) could be as few as ten (10). Thus, Oversight assumes DOR can absorb the responsibilities associated with the new tax credit program with existing resources. Should DOR experience the number of redemptions, transfers,

L.R. No. 0214S.01I Bill No. SB 143 Page **5** of **12** January 31, 2023

and/or correspondence that warrant additional FTE, DOR may seek additional FTE through the appropriation process.

Officials from the **Department of Economic Development (DED)** assume 135.1620 allows a taxpayer to claim a tax credit equal to 50% of the taxpayer's eligible expenses for establishing a full-service grocery store in a food desert. The taxpayer cannot claim more than \$2.5M/tax year but the credit may be carried over for three years until full credit has been claimed. Program is capped at \$25M per year.

DED will need to hire 2.0 FTE to review applications, determine qualifications, and calculate eligible amounts, review final qualifying expenses, complete compliance and to administer the program.

Oversight notes this proposed legislation creates a tax credit for individuals, partnerships, corporations or various charitable organizations who establish a full-service grocery store within a food desert.

This proposed legislation defines "food desert" as a census tract that has a poverty rate of at least twenty percent (20%) or a median family income of less than eighty percent (80%) of the statewide average and where at least five hundred (500) people or thirty-three percent (33%) of the population are located at least one-half mile away from a full-service grocery store in urbanized areas or at least ten miles away in rural areas.

Based on data published by the <u>United States Department of Agriculture</u> (USDA) in 2019, there were approximately 390 census tracts in Missouri in 2010 that were classified as low-income and low-access (one-half mile from a full-service grocery store in urban areas or ten miles from a full-service grocery store in rural areas). Oversight will show the number of low-income/low-access tracts per county below (counties with no low-income/low-access are not included in the chart):

L.R. No. 0214S.01I Bill No. SB 143 Page **9** of **12** January 31, 2023

Oversight notes the DED assumes the need for 2 FTE to properly initiate and develop processes to comply with the rules in this proposal.

Oversight notes that the proposal allows minimum of 10 businesses to receive this tax credit (25 million cap where each business obtain the max of 2.5 million per each, as specified in Section 135.1620 3. (2)); however, the number could be substantially greater (up to 390 in the areas of need as shown above) for such grocery stores in Missouri.

Oversight will reflect a range from 0 FTE (no full-service grocery store is established within a food desert) to 1 additional FTE for DED (Senior Economic Development Specialist at 74,664 annually) in the fiscal note.

Oversight notes, in order to qualify for the tax credit created, initial expenses must be incurred equal to \$1 million if the full-service grocery store is established in a charter county, a county of the first classification, or a city not within a county or \$500,000 if the full-service grocery store is established in any other county.

The tax credit authorized under this proposed legislation may not exceed the taxpayer's state tax liability and is, therefore, not refundable. However, any amount of tax credit that exceeds the taxpayer's state tax liability in the year in which the "contribution" was made may be carried forward to the next three (3) succeeding tax years.

Oversight assumes a "contribution" to be the expenses incurred in establishing a full-service grocery store. The tax credits created under this proposed legislation may be transferred, sold, or assigned. The tax credit program created would sunset on December 31, 2030.

Oversight notes this proposed legislation creates a clawback provisions for taxpayers that are issued credits authorized under this section but fail to complete construction of a full-service grocery store within five years of the commencement of the project or fails to operate a full-service grocery store at the same new location for at least ten consecutive years. Oversight is unable to determine whether or not this clawback provision will have an impact on state revenues and will not show an impact for this portion of this proposed legislation.

Oversight notes the proposed legislation states a new location is a full-service grocery store located on a tract of real property within a food desert that is acquired or leased on or after January 1, 2024. Thus, the first tax year in which taxpayers could claim the tax credit created is Tax Year 2024; Tax Year 2024 tax returns will not be filed until after January 1, 2025 (Fiscal Year 2025).

Therefore, Oversight will report a <u>reduction</u> to GR equal to "\$0 up to \$25,000,000" beginning in Fiscal Year 2025. A reduction to GR equal to \$0 would occur if no full-service grocery store is established within a food desert in the particular tax year and a reduction to GR equal to \$25,000,000 would occur if the annual cap is met.

L.R. No. 0214S.01I Bill No. SB 143 Page **10** of **12** January 31, 2023

Officials from **Missouri Department of Agriculture (MDA)** assume the proposal will have no fiscal impact on their organization. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for MDA.

Rule Promulgation

Officials from the **Joint Committee on Administrative Rules** assume this proposal is not anticipated to cause a fiscal impact beyond its current appropriation.

Officials from the **Office of the Secretary of State (SOS)** note many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$5,000. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with its core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

FISCAL IMPACT – Small Business

Some small business will be able to experience direct fiscal impact would be as a result of this proposal.

FISCAL DESCRIPTION

For all tax years beginning on or after January 1, 2024, this act authorizes a tax credit for expenses incurred in the establishment of a full-service grocery store located in a food desert, as such terms are defined in the act. The tax credit shall be equal to fifty percent of eligible expenses that are in excess of initial expenses, which shall be at least \$1 million in eligible expenses if the full-service grocery store is located in a charter county, a first class county, or in St. Louis City, or at least \$500,000 if located in any other county.

A taxpayer shall apply to the Department of Economic Development and shall indicate the amount of eligible expenses, the date of the commencement of construction and operations, and any other information required by the Department.

The tax credit authorized by this act shall not exceed \$2.5 million per tax year and shall not be refundable, but may be carried forward for three subsequent tax years. The total amount of tax credits authorized under this act shall not exceed \$25 million per calendar year, and shall be issued on a first-come, first-served basis.

The Department shall recoup from a taxpayer any amount of tax credits issued if the taxpayer fails to complete construction of the full-service grocery store within five years of commencement of the project or if the taxpayer fails to operate the full-service grocery store for at least ten consecutive years. A taxpayer shall annually submit a report to the Department indicating compliance with the act.

This act shall expire on December 31, 2029, unless reauthorized by the General Assembly.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
