FISCAL ANALYSIS

ASSUMPTION

§558.041 – Good time credit

Officials from the **Department of Corrections (DOC)** state this proposal modifies provisions relating to good time credit.

Currently, the department does not have an automated system that could track and calculate the good-time credits as described in the legislation. As such, the department is unable to project the impact to the prison population. However, it is assumed the legislation could decrease the number of individuals incarcerated.

Without automation to calculate the good-time credits, the department would have to calculate these credits by hand, which would be additional work for Division of Adult Institutions Records Officers. It is unknown to the department how many additional staff may be needed in order to comply with the legislation.

In response to similar legislation from 2022 (HB 2397), DOC stated they would have to contract with a vendor to design and develop an automated system to track and calculate the good-time credits as described in this legislation, and estimated the cost to be greater than \$250,000.

Oversight does not have any information contrary to that provided by DOC. Oversight assumes the IT system development will occur in FY 2025 and will reflect DOC's impact of (Unknown, Greater than \$250,000) for FY 2025 and no programming impact in subsequent years. Additionally, as this new program may decrease populations for DOC, Oversight will reflect a potential savings (\$0 or Unknown) in FY 2026 and FY 2027. Oversight notes, in response to other legislation this year, DOC has used a per-inmate cost of \$9,689 to the General Revenue Fund per year.
