## FISCAL ANALYSIS

### ASSUMPTION

Officials from the **Missouri Office of Prosecution Services** did not respond to **Oversight's** request for fiscal impact for this proposal.

#### §650.055 – Collection of Biological Samples in Criminal Cases

Officials from the **Department of Public Safety-Missouri Highway Patrol (MHP)** state §650.055.2 of the proposed legislation could expand Missouri's database to include more offenders, up to an estimated additional 13,899 DNA collections annually. This expansion creates the need for an additional Senior Forensic Scientist position to perform the analysis of the additional samples as well as the expense and equipment costs to purchase laboratory supplies and equipment for the collection and development of DNA profiles.

The MHP's costs to General Revenue of up to \$1,432,787 for FY27; \$1,455,486 for FY28; and \$1,458,841 for FY29.

Upon further inquiry, the **MHP** stated this proposal will nearly double the number of samples currently collected and processed (14,802 samples in 2025 vs. 13,899 additional projected).

The \$1.29 million in additional laboratory expenditures is based on actual historical expenditures for instrumentation, consumables, reagents and supplies to process the anticipated increase in DNA samples. Due to the increase in the number of samples being processed, new equipment will be purchased on a gradual basis to replace older equipment. The MHP does not plan on expanding the number of instruments but rather replacing older equipment with newer, more efficient systems. In addition to the purchase of new equipment, there will be a need for training on the new instrument(s) and the purchase of new consumables not currently used in the lab. The Patrol believes that once ongoing equipment purchases are complete, the costs of maintenance contracts along with the annual increase in consumables will keep budget needs at the same level rather than decreasing.

**Oversight** has no information to the contrary and will, therefore, present the fiscal impact of this proposal as up to the estimated provided by the Patrol.

Officials from the **Department of Health and Senior Services, Department of Corrections, Office of the State Courts Administrator, Office of the State Public Defender, Phelps County Sheriff, Kansas City Police Department, and St. Louis County Police Department** each assume the proposal will have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

In response to similar legislation, HB 2868 (2026), officials from the **Blue Springs Police Department, Branson Police Department** and **Perryville Police Department** each assumed the proposal would have no fiscal impact on their respective organizations. **Oversight** does not have any information to the contrary. Therefore, Oversight will reflect a zero impact in the fiscal note for these agencies.

**Oversight** only reflects the responses that we have received from state agencies and political subdivisions; however, other local law enforcement agencies were requested to respond to this proposed legislation but did not. Upon the receipt of additional responses, Oversight will review to determine if an updated fiscal note should be prepared and seek the necessary approval to publish a new fiscal note. A general listing of political subdivisions included in our database is available upon request.

FISCAL IMPACT – Small Business

No direct fiscal impact on small businesses would be expected as a result of this proposal.

### FISCAL DESCRIPTION

Currently, any person found guilty of a felony offense shall have a fingerprint and DNA sample collected. Additionally, any person over seventeen years of age arrested for certain felony offenses as well as burglary in the first and second degrees must have a fingerprint and DNA sample collected. This act provides that every person seventeen years of age and older who is arrested for any felony offense as well as the offense of burglary in the second degree must have a fingerprint and DNA sample collected.

This act also provides that no additional sample is required if it has been determined that the person's DNA is already included in the DNA database.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
