FISCAL ANALYSIS

ASSUMPTION

The **Department of Revenue (DOR)** and the **Department of Agriculture (AGR)** assume they would not be fiscally impacted by this proposal.

Oversight assumes this proposal would allow llamas to be treated as livestock for sales tax purposes. According to the AGR, there are approximately 4,500 llamas in Missouri and llamas eat approximately 15 pounds of food per day. **Oversight** assumes the average cost for a pound of llama feed is \$.125. For purposes of providing a fiscal estimate for this proposal, Oversight used \$.15 per pound of feed to account for other items that would be exempt from state and local sales tax such as feed additives, bedding and medications. Accordingly, Oversight estimated there would be sales of \$3,695,625 per year that would be exempt from state and local sales tax under 144.030 2 (22) RSMo. Oversight assumes this would result in a total loss of state sales tax revenue in the amount of \$156,141. There would also be a loss of sales tax revenue to local governments in the amount of \$55,435 per year.

FISCAL IMPACT - Small Business

Small businesses that produce and sell llamas could be expected to be fiscally impacted by this proposal. Their production costs could be reduced by the amount of sales tax avoided.

DESCRIPTION

This bill adds llamas to the definition of livestock rather than exotic animals. Additionally, this bill adds llamas to Section 144.010 (4) for sales tax purposes.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
