FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Corrections (DOC)** assume the costs of risk assessments for sex offenders range from an estimate of approximately \$215 to \$415, depending on whether hourly staff conduct these assessments or whether the service is contracted out. Sex offender cases that were open to probation accounted for 653 persons in calendar year 1998 and 738 persons in 1999. There is an average of 457 sex offenders released from DOC prisons per year.

Costs that may be associated with a multi-discipline committee are daily per-diem expenses for committee members on meeting days; potential costs for meeting rooms; and costs associated with publication of Notice Guidelines. There may be additional unknown costs associated with victim notification. In summary, the potential cost for the DOC is a substantial amount or one that could exceed \$100,000 per year.

Oversight assumes the proposed legislation would require the **Department of Public Safety** to disclose information upon request to the public regarding high-risk sex offenders. However, Oversight assumes this will have minimal impact on DPS.

Officials from the **Department of Social Services, Department of Elementary and Secondary Education, Department of Mental Health, and the Department of Health** assume the proposed legislation would have no fiscal impact on their agencies.

L.R. NO. 3819-01
BILL NO. SB 844
PAGE 3 OF 2
February 1, 2000

DESCRIPTION

The proposed legislation would allow community notification regarding certain registered sex offenders. The proposal provides immunity for release of information by law enforcement, and by employees of the Departments of Corrections, Public Safety, and Social Services. The Department of Corrections shall assess the person who must register at least ninety days prior to the offender's release, based on the basis of risk to commit offenses requiring registration. The act tailors the extent of any community notification to the assessment results.

This legislation is not federally mandated, would not duplicate any other program, and would not require additional capital improvements or rental space.
