FISCAL ANALYSIS

ASSUMPTION

Department of Revenue (DOR) officials state this legislation authorizes a tax credit equal to 50% of a taxpayer's contribution to an unplanned pregnancy resource center, not to exceed \$50,000 per taxable year. The tax credit is non-refundable, but can be carried over to the next four succeeding years. In order to receive the credit, the taxpayer's contributions must have a value of \$100 or more. The Director of the Department of Social Services will determine annually which facilities in this state qualify as an unplanned pregnancy resource center. Each unplanned pregnancy resource center is to provide Social Services with the identity of each taxpayer making a contribution and the amount of the contribution. Social Services will provide that information to DOR. The credit shall apply to all tax years beginning on or after January 1, 2002.

ADMINISTRATIVE IMPACT:

The number of taxpayers who will contribute and become eligible for this credit is unknown at this time. The Division of Taxation, Personal Tax Bureau will need one Tax Processing Technician I for every 10,000 new credits claimed per year (processing) and one Tax Season Temporary for every 75,000 credits claimed per year (key entry). Also, one Tax Processing Technician I will be needed for six months for every 30,000 additional individual income tax errors generated from this legislation and one Tax Processing Tech I for every 3,000 pieces of correspondence generated from this legislation. The Business Tax Bureau will need one Tax Processing Tech I for every 3,680 credit claims received on corporate tax.

This legislation will require modifications to the income and corporate tax systems and credit application system. The Division of Taxation estimates these modifications, including programming changes, will require 1,384 hours of contract labor, at a cost of \$46,170. Modifications to the income tax return and schedules will be completed with existing resources. State Data Center charges will increase due to the additional storage and fields to be captured. Funding in the amount of \$9,007 is requested for implementation costs.

Officials of the **Department of Social Services, Division of Budget and Finance (DBF)** assumes DBF staff would be responsible for determining which facilities meet the criteria of subsection 1 and DBF would also establish procedures and perform the task of "equitable allocating credits to qualified resource centers."

The cumulative amount of tax credits allowable in any fiscal year is \$2,000,000. DBF staff would do an initial allocation of the credits at the beginning of each fiscal year then reevaluate the apportionment of unused credits to ensure maximum use of the credits.

ASSUMPTION (continued)

calls with Missouri Right to Life staff, DBF believes there are between 50 and 100 such facilities that would meet the criteria of subsection 1. Based on an estimated number of 85 facilities, DBF could perform the requirements of the legislation with one new Accounting Analyst I.

The Accounting Analyst I would be responsible for reviewing documents provided by the facilities to determine if they meet the criteria of subsection 1. The analyst would establish procedures to equally allocate credits to eligible unplanned pregnancy resource centers. To reapportion unused credits, the analyst would collect interim tax credit utilization information during the fiscal year and make the calculations necessary to reallocate unused credits. The analyst would collect and compile annual tax credit information and prepare a report for the director to send to DOR. Existing staff would provide supervision of the Accounting Analyst.

Officials from the **Office of Administration, Division of Budget and Planning (BAP)** assume this tax credit is capped at \$2 million annually. There is no empirical basis to estimate the fiscal impact of this proposal. Therefore, BAP estimates the impact to be between \$0 and \$2 million annually.

Officials from the **Office of the Secretary of State (SOS)** assume this bill establishes a tax credit for money given to unplanned pregnancy resource centers. Although the bill does not specifically address rule making, this bill may lead to DOR or DOS promulgating rules. These rules will be published in both the *Missouri Register* and the *Code of State Regulations*. Based on experience with other divisions, the rules, regulations and forms issued by DOR or DOS could require as many as 8 pages in the *Code of State Regulations*. For any given rule, roughly half again as many pages are published in the *Missouri Register* in the Code because cost statements, fiscal notes and the like are not repeated in the Code. These costs are estimated. The estimated cost of a page in the *Missouri Register* is \$23. The estimated cost of a page in the *Code of State Regulations* is \$27. The actual cost could be more or less than the numbers given. The impact of this legislation in future years is unknown and depends upon the frequency and length of rules filed, amended, rescinded or withdrawn.

Oversight assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of regulations at substantial costs, the SOS could request funding through the appropriations process. Any decisions to raise fees to defray costs would likely be made in subsequent fiscal years.

Officials of the **Department of Insurance (INS)** state this proposal would grant tax credits against an insurer's premium tax payments (chapter 148 RSMo) for contributions to Unplanned Pregnancy Resource Centers. Maximum annual credit per taxpayer is \$50,000. Total credits are capped at \$2 million annually.

ASSUMPTION (continued)

Tax credits for this legislation would not begin until 2002 tax year which would be paid 3/2003. Legislation could potentially be taken by 1,638 insurance companies. INS estimates the maximum tax credits of \$2 million will be taken, resulting in a decrease in premium tax revenue. Premium tax revenue is split 50/50 between GR and County Foreign Insurance Funds. County Foreign Insurance Funds are later distributed to school districts after they have been collected by the state.

This proposal would result in a decrease in Total State Revenues.

FISCAL IMPACT - Small Business

Certain small businesses may receive tax credits or benefit from the donations encouraged by the tax credits.

DESCRIPTION

This proposal would allow a tax credit for persons contributing to unplanned pregnancy resource centers. Section 135.630, RSMo, defines "unplanned pregnancy resource center" as one that provides predominantly free assistance in the event of an unplanned pregnancy but does not perform childbirths or abortions and is tax exempt. If a taxpayer would contribute at least \$100, then he or she may take a tax credit of up to fifty percent of the amount contributed to a resource center. The credit may not exceed \$50,000 in a year and any amount exceeding the taxpayer's state tax liability may be carried over for four years. Each year, the director of the Department of Social Services would determine which facilities are unplanned pregnancy resource centers and may request information in order to determine this status. The cumulative amount of tax credits claimed due to contributions may not exceed two million dollars in any fiscal year. The director would have the authority to reallocate tax credits among unplanned pregnancy resource centers, if necessary. Each resource center would provide to the Department of Revenue the identity of each taxpayer who has contributed to the center and the amount of the contribution. This proposal would apply to all taxable years beginning after December 31, 2001.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
