## FISCAL ANALYSIS

### ASSUMPTION

Officials from the **Department of Elementary and Secondary Education** and the **Office of Secretary of State - Elections** indicated this proposed legislation would have no fiscal impact on their agencies.

Officials from the **Poplar Bluff R-I School District** stated they would see no loss or gain to their school district as a result of this proposal. They indicated that while it clarifies the procedure, it has no financial implications. The only loss or gain to a district would be property actually changed from one district to another, resulting in a loss of assessed valuation, local taxes, and pupils for one district and a gain for the other district.

### DESCRIPTION

This proposed legislation applies standards to be utilized by the Board of Arbitration in determining whether a proposed school district boundary change is necessary. The standards for such a determination include the presence of: school-aged children in the affected area; actual educational harm to school-age children (significant differences in transportation time or educational opportunities); an educational necessity, not a commercial benefit to landowners.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
